

Business Questions Answers - WealthBridge Advisors

Q1

Female investors show stronger preference for PPF and Mutual Funds. Male investors also prefer PPF and Mutual Funds. Debentures and Gold are the least preferred for both genders.

Q2

Across Early, Established and Experienced Adulthood, PPF and Mutual Funds remain the most preferred investment avenues, while Gold and Debentures are least preferred.

Q3

Returns are the leading factor influencing investment decisions across all age groups, followed by Risk. Locking Period has the least influence.

Q4

Investors with 3–5 year investment durations mainly save for Retirement Plans. Health Care is the next common objective, while very short and very long durations have fewer investors.

Q5

Better Returns is the strongest reason for investing in mutual funds, especially among investors expecting 20%–30% returns. Fund Diversification follows, while Tax Benefits are less influential.

Q6

KPIs: Total Investors = 40; Male Investors = 62.5%; Female Investors = 37.5%; Average Age = 27.8 years; Most Preferred Source of Investment Information = Financial Consultants.

Overall Insight

PPF and Mutual Funds dominate investor preferences across genders and age groups. Investors prioritize returns and retirement planning, and Financial Consultants are the most trusted information source. WealthBridge Advisors should focus on long-term investment products and strengthen personalized advisory services.
